Customer No.: 31561  
Docket No.: 10217-US-PA  
Application No.: 10/707,608

**REMARKS****Present Status of the Application**

The Office Action objected the specification and rejected all presently-pending claims 1-11. Specifically, the Office Action rejected claims 1-11 under 35 U.S.C. 102(b), as being anticipated by Troutman. (U.S. 6,157,356). Applicants have amended the specification to overcome the objection and amended claims 1, 2 to overcome the rejection. Applicants also added claims 12-17. After entry of the foregoing amendments, claims 1-17 remain pending in the present application, and reconsideration of those claims is respectfully requested.

**Discussion of Office Action Objections and Rejections**

In the specification, "Ito" is amended as --I to-- in paragraph [0026], "P9408" is amended as --P(408)-- in paragraph [0029] and "conclusions" is amended as --conclusion-- in paragraph [0031] to overcome the objection.

The newly added claims 12-17 are described in paragraphs [0025], [0027] and shown in Fig 4, and no new matter is entered. Especially, the first and second external power lines of claim 12 are the two external power lines 402, 404 of Fig. 4. However, the number of external power lines is not limited in the present invention. Three or more external power lines may also be applied to the organic light emitting display of the present invention.

Docket No.: 10217-US-PA  
Application No.: 10/707,608

*Applicants respectfully traverse the 102(b) rejection of claims 1-11 because Troutman (U.S.6,157,356) does not teach every element recited in these claims.*

In order to properly anticipate Applicants' claimed invention under 35 U.S.C 102, each and every element of claim in issue must be found, "either expressly or inherently described, in a single prior art reference". "The identical invention must be shown in as complete details as is contained in the .... claim. Richardson v. Suzuki Motor Co., 868 F. 2d 1226, 1236, 9 USPQ2d 1913, 1920 (Fed. Cir. 1989)." See M.P.E.P. 2131, 8<sup>th</sup> ed., 2001.

The present invention is in general related an as claim 1 recites:

Claim 1. An organic light-emitting display having a plurality of pixels and a plurality of external power lines, the organic light-emitting display being characterized in that:

*each of the external power line diverts into a plurality of internal power lines, and each internal lines is electrically connected to a portion of the pixels, wherein the internal power lines connected to different external powers line are not connected together.*

Troutman fails to teach that the organic light-emitting display comprises a plurality of external power lines, each external power line diverts into a plurality of internal power lines, and the internal power lines connected to different external powers line are not connected together.

In Troutman's reference, an OLED display is disclosed as shown in Fig.1A and 1B. Troutman only teaches the bias voltage V<sub>b</sub> is applied to all diodes in the display (col. 2, lines 29). Troutman does not teach or suggest how the bias voltage V<sub>b</sub> is applied to each diode. Troutman does not teach or suggest that the power source applied to each diode is by using a plurality of external power lines and a plurality of internal power lines, wherein each of the external power line diverts into a plurality of internal power lines, and each internal lines is electrically connected to

connected to a portion of the pixels, and the internal power lines connected to different external powers line are not connected together.

Therefore, Troutman does not teach every element recited in claim 1. Applicant respectfully submits that independent claim 1 patentably define over the prior art reference, and should be allowed. For at least the same reasons, dependent claims 2-11 patentably define over the prior art as well.

**CONCLUSION**

For at least the foregoing reasons, it is believed that the pending claims 1-17 are in proper condition for allowance. If the Examiner believes that a telephone conference would expedite the examination of the above-identified patent application, the Examiner is invited to call the undersigned.

Respectfully submitted,

Date: April 14, 2005
